JASON LEE

Jason's Computer Services

9231 Centreville Rd
Easton, MD
410-820-9467
office@jcscmp.net
www.jcscmp.net

Some say that technology runs through Jason's veins. Jason Lee founded Jason's Computer Services in 1999 when he saw a particular need for specialized technology services on the Eastern Shore. A childhood Leukemia Survivor first diagnosed late 1984, he was sick for most of his childhood life, in and out of hospitals for almost 3 years. Jason eventually ended up at Children's Hospital in Milwaukee, Wisconsin, where his life would change forever with the ultimate gift of life.

With a less-than-1% chance to live from AML Leukemia, Jason needed an unrelated bone marrow transplant and, luckily, a female donor was found. The operation was a success and completed in late-1987. Jason has been cancer free for 33 years and is the longest living recipient of an unrelated bone marrow transplant with a still-living donor.

For the past 20 years, he has led his area in IT leadership and excellence. Ever since Jason was a young age, he loved anything technology, including computers, video games, cell phones, and networking. Jason is incredibly involved in his local community, its children's futures & local events.

OF TECHNOLOGY

JASON'S COMPUTER SERVICES

9231 Centreville Rd, Easton, MD | 410-820-9467 | office@jcscomp.net | www.jcscomp.net

Technology is more important now than ever before. How does technology play a role in your life? Do you wish you made different tech choices along the way? Perhaps to have invested in higher-speed internet service, a better router, or a faster laptop? This year has been a test for us, making consumers think about the future and what role technology will play in it. This is where the role of a Managed Service Provider (MSP) comes into the picture.

Choosing the right MSP can be a difficult decision. Managed Service Providers are a type of company that handles your IT needs, from small to large. Whether you are a small business, three-person law firm, for example, or as large as an ACE Hardware Store with 25 computers and two servers, Jason's Computer Services is the clear MSP choice. With a combined 45 years of experience, the company can solve any problem presented to it.

In addition to being a full-service MSP, Jason's has a full service "showroom" that showcases over 500 brand new computers, including laptops and desktops, including Apple, Dell, HP, and Lenovo. Jason's currently does work for over 90 local businesses on the Shore and over 5,000 residential accounts yearly. Is your current MSP the right choice? On average, we convert three accounts per month that are not satisfied with their current MSP provider. Maybe you're overpaying and do not even know it. Call for a business consultation today. Jason holds a Computer Science Degree from Chesapeake College, including MCSE, MCP, CCNA, A+, and Net + Certificates. Jason's staff also holds specialized certifications. While some might look at cancer as a big setback in life and living with the complications that come as a long term detriment, Jason saw his second chance at life as an opportunity to build a successful business. Jason's Computer Service understands the demands of technology in today's world. It is clear to see why Jason is the Eastern Shore's Face of Technology.

Instrumental Music teacher Paula Sweterlitsch describes her role as “guiding students while their inspiration leads the way.” However, there is so much more to the magic she creates with her students.

At Indian Creek, Ms. Sweterlitsch teaches instrumental music to students in grades 3-12, leading strings classes, brass ensembles, concert band, and a variety of student-driven spin-off groups, including a jazz/blues ensemble, pep band, and even a *Dave-Matthews-Band*-inspired acoustic group.

“I love when kids come in, jazzed about something that they were doing in their last class, and their excitement sparks an idea about how we can try the activity with music. Anything is possible.” This enthusiasm creates a vibrant environment, leading to some truly great moments. Recently, an accomplished high-school drummer joined her fifth-grade strings class and started to play along. The energetic beat thrilled and inspired the younger students.

Ms. Sweterlitsch loves teaching at ICS because the arts are inherent in the fabric of the community. Outside of school, she fuels her passion by playing with touring artists at the Kennedy Center and other venues.

Success in math involves much more than just working with numbers. It's about developing a growth mindset and the confidence to tackle challenges when they inevitably arise. Lower School math specialist Ms. Stacy Shaener teaches kindergarten through 5th-grade students the skills they need to take ownership of their learning with creativity and joy. With a focus on real-world problem-solving, her students discover the many ways that math shapes our daily lives. Her classrooms buzz with energy as students eagerly share their thinking, help each other overcome challenges, and develop new ways of looking at the world.

"Helping students identify in themselves what they do well is so important. And we have to be really specific with students about what their strengths are. When I give feedback in class, it's never just 'Great job.' I choose specific things from their work to help model this thinking for them, 'I like how you were able to break up those numbers' or 'I like how you added on to Stacy's idea.'"

Ms. Shaener believes that building a supportive community around math helps students reach their fullest potential. She teaches summer camps, leads teacher and parent workshops, and finds professional development opportunities to keep her curriculum fresh. Working with educators like math innovators Greg Tang, Jo Boaler, and Sue O'Connell, she models the same collaboration and positive enthusiasm she hopes to instill in her students. At Severn School and in our local community, Ms. Shaener is changing attitudes about math one smile at a time.

Personal and Professional ~ I have always focused on people, not houses. It was clear to me from the beginning, that it doesn't matter if a home is 200,000 or 6 million, it is a huge deal for EVERY client. My wife and I joke all the time about it, but I truly feel that I am a psychologist in disguise. Every transaction, whether buying or selling, involves a series of complex personal decisions layered with emotions, finances and stress. My military background and training taught me to be calm in any and all circumstances. Those skills have been finely tuned daily in real estate. When things are most chaotic, it is even more important to be the calm and guiding voice. Buying or selling a house is not the same as calling in an air strike in Fallujah, but to my clients, it may feel like it.

People need to know that their advocate is going to be there for them, has their best interests in mind, and will guide them through one of their most important life decisions. Marketing trends, advertising, community connections, staging a home, market expertise, etc. is obviously a huge part of my business, but in the end it all comes back to people.
